

## Cable Harnesses

Intelligent Cabling for Your Aircraft In-Seat Systems

### Your Complete Solution Provider

Astronics PGA works with your team to deliver smart cable harnesses that reduce your manufacturing time and production costs.

We start with your 3D routing and work with you from definition through design, bill of materials, drawings, and production to deliver your custom cable configuration. We also offer support and complete certification packages.

### Put Our Supply Chain and Manufacturing Capacity to Work for You

Astronics PGA defines and manufactures any type of harness, from standard references harnesses to specialty configurations. We collaborate with all specialized aerospace suppliers and offer you the cost- and time-saving benefits of a robust supply chain.

With a flexible manufacturing model, we can expand capacity when necessary to ensure your project timelines are met.

## Quality First

Astronics PGA provides you with state-of-the-art designed products which are 100% fully inspected during production.

Our staff is fully trained and approved to incorporate lean manufacturing principles in our production line.

## Customized and Optimized

Astronics PGA works with your team to define the best harness structure while minimizing part count, installation time and costs for logistics and related storage.

All of our cables are Airbus and Boeing standards compliant.

Count on us to complete your project with the utmost efficiency.
