INTERIORS & STRUCTURES SOLUTIONS

Your Expert, Proven Supplier for Aircraft Interior Components

Save engineering time and mitigate production risk with the experienced, responsive innovation of Astronics. Working in partnership with you, Astronics serves as your expert resource for creating and producing aircraft components to meet your exact requirements and seamlessly dovetail into your production line schedules.

We support global airframe manufacturers and prime OEMs with design, tooling, integration, manufacturing, validation, certification, and installation services. Together with our customers and technology partners, we collaborate to co-develop solutions that achieve your vital time and cost objectives.

For 50 years, our systems have enhanced both the safety and pleasure of flying for passengers and crew.

Count on Astronics for:

Integrated solutions—solutions can include power, lighting, connectivity, and other technologies for your aircraft

Custom development—through a vertically integrated process that includes planning, design, engineering, manufacturing, test and delivery

Smart design—with future-proof technology and cost-effective maintenance and upgrade paths

Experience in the ecosystem—with a globally installed base of solutions on multiple aircraft platforms

Worldwide support—available for 24/7/365 customer service, support, and maintenance

Innovative. Collaborative. Experienced.

Worldwide customer base. World class technology. Astronics brings it all together to make your next custom aircraft interior or structure program a success.

Fuel Tank Access Doors

Design, injection molding, casting, and finishing services incorporating advanced manufacturing processes for traditional and carbon fiber wing construction.

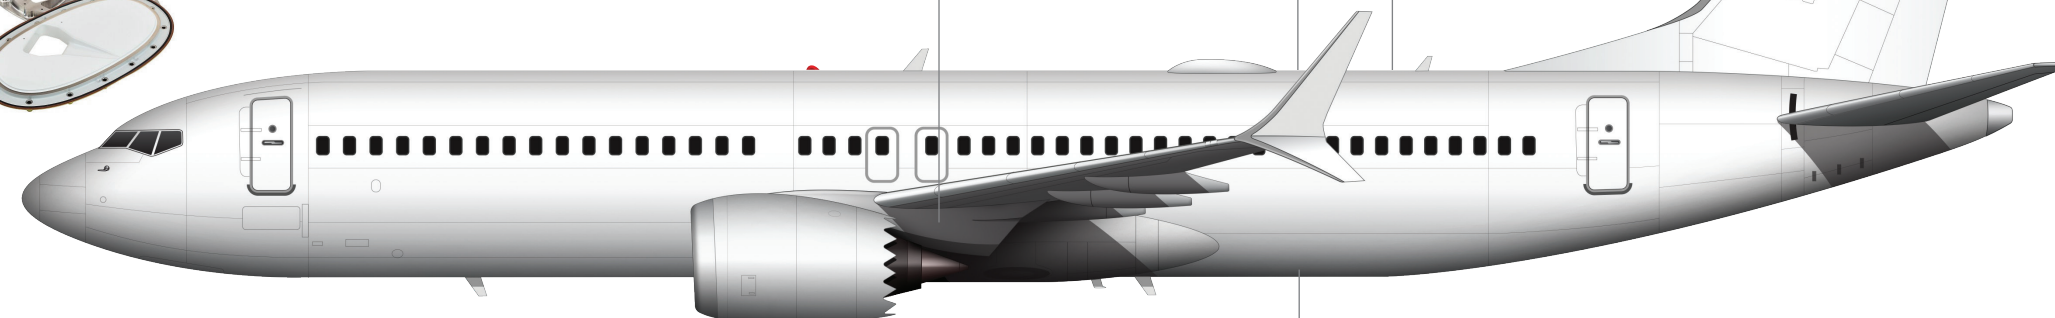

SmartTray®

Intelligent tray tables that hold passenger electronic devices for easy viewing. Optional wireless power charging available.

Passenger Service Units

Design, development, manufacturing, assembly, test, and qualification services.

Other Custom Developed Solutions

- Integrated oxygen systems
- Cabin speakers
- Emergency lighting
- Window reveal and accent lighting
- Cabin aesthetic lighting
- Interior panel integration
- IFE chassis and panels
- Military medical support equipment

Environmental Control Systems

Advanced air flow systems, designed for passenger comfort, manufacturability, and moldability.

Astronics—The World's Aircraft Manufacturing Partner

Working together, we enable airframe manufacturers and OEMs to develop cost-effective, long lasting interior and structural solutions.

Program experience includes solutions for:

- | | |
|-----------------|----------------------|
| Airbus | Business Aviation |
| Boeing | Commercial Transport |
| Embraer | Fixed-Wing Aviation |
| Lockheed Martin | Rotorcraft |
| Raytheon | VIP Aircraft |

Certifications

These certifications represent our commitment to quality, safety, environmental standards, and efficiency.

Astronics Corporation (NASDAQ: ATRO) serves the world's aerospace, defense, and other mission critical industries with proven, innovative technology solutions. We work side-by-side with customers, integrating our array of power, connectivity, lighting, structure, interior, and test technologies to solve complex challenges. For 50 years, we've delivered creative, customer-focused solutions with exceptional responsiveness. Today global airframe manufacturers, airlines, military branches, completion centers, and Fortune 500 companies rely on the collaborative spirit and innovation of Astronics.
